

Company RWE Gas Slovensko is presently able to cover natural gas consumption of its customers

- > In doing so it cooperates actively with the distribution system operator, company SPP Distribúcia**

Despite the current Russia – Ukraine gas crisis, company RWE Gas Slovensko (RGS) is able to cover the needs of its customers in Slovakia.

In cooperation with the parent concern RWE, it was possible to secure natural gas supplies from the sources of Slovak underground storages.

Despite the sufficient gas reserves of RWE Group, company RWE Gas Slovensko has to respect the state of emergency which has been declared by the Ministry of Economics of SR. Therefore it cooperates closely with the distribution system operator SPP Distribúcia when limiting gas consumption of customers according to the declared control stage. RGS is prepared to respond to the next situation development immediately.
